Leonardo Castillo Mendoza
Junior Software Developer

Summary

I'm resident from Dominican Republic, Santo Domingo, currently I'm 17 years old. I started to learn computer science at the age of 12 but got serious with it at 14 years old, since that time I'm really interested about technology in general. My objective as a developer is to create scalable, easy-to-maintain application and services offering a good experience to the end User.

Experience

Junior Web Developer

I worked on projects with new ideas and gained experience in web application development and OOP concepts.

Design Patterns

Developed knowledge of database architecture.

Design and implementation of data storage solutions.

Design and build web-based solutions based on customer needs.

Due to the projects I was working on I managed to understand the main business processes and collaboration with teammates.

Technologies

PostgreSQL   Git   MongoDB   Azure Cloud
